DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamagishi et al (5,779,563). Regarding claims 1 and 2, Yamagishi discloses a golf ball comprising a core and cover. The diameter of the golf ball may be up to 46 mm (col. 3, lines 53-54; col. 4, lines 34-36). The cover has a specific gravity from 1.10 to 1.25 (col. 4). The moment of inertia of the golf ball is between 81.4 and 88.4 (table). Regarding claims 3 and 4, while Yamagishi does not disclose specific examples of the diameter claimed by applicant the modification is obvious to one of ordinary skill in the art since Yamagishi clearly discloses higher limits for the golf ball diameter, i.e, up to 46 mm.
